

Solar panel quotes Tokelau

Can Tokelau support itself with solar energy?

Tokelau, an island nation in the South Pacific, is now completely able to support itself with solar energy. Elly Earls met Joseph Mayhew of the New Zealand Aid Programme to find out how this tiny collection of atolls has become almost 100% self-sufficient in less than 12 months.

Could Tokelau be the world's first renewable nation?

Solar power plants and coconut biofuel-powered generators switched on in Tokelau has made the islands the world's first truly renewable nation.' Imagine a place where the only energy to be found is clean, reliable solar power. Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy.

How much electricity does a solar system provide in Tokelau?

Each system alone is among the largest off-grid solar power systems in the world, and together they are capable of providing 150% of current electricity demand in Tokelau, a much higher amount than the 90% that was originally planned for.

Why did Tokelau switch to solar?

Yet despite the challenges involved in installing comprehensive solar systems in such a remote location, switching to solar was absolutely crucial for the tiny collection of islands. 'Tokelau's atolls are low-lying and especially susceptible to the adverse effects of climate change,' Mayhew stressed.

Why is electricity so expensive in Tokelau?

Before the PowerSmart systems were installed on the nation's three atolls, Tokelau was highly dependent on imported fossil fuels to meet its energy needs and therefore vulnerable to international price fluctuations and increasing fuel costs, making electricity extremely expensive for both households and businesses.

How many people live in Tokelau?

Tokelau is made up of three small atolls, Atafu, Nukunonu and Fakaofu, has an area of around 10km²; and is populated by 1,411 New Zealand citizens, all of whom now have their energy needs met by solar electricity systems. 'Each system alone is among the largest off-grid solar power systems in the world.'

This report highlights the world-first achievement of Tokelau in using renewable energy sources (solar energy and coconut oil) for all its electricity. It explains why Tokelau decided to switch ...

The power rating of the solar panels, measured in watts (W), is also an important indicator of quality. For instance, a 430W solar panel will be able to generate more electricity than a 330W solar panel in the same ...

Thanks to joint funding by the government of Tokelau and New Zealand, the Tokelau Renewable Energy Expansion Project (TREETP) is now underway; set to return Tokelau to approximately 100% renewable energy

...

The project includes : 4032 solar modules, 196 string inverters, 112 DC charge controllers, 84 battery inverters and 1344 batteries in 48V banks. The system allows for up to 2 days of energy without any solar input.

They decided that solar energy could be a cost-effective option well-suited to Tokelau's climate. Over four thousand solar panels were installed, making Tokelau the first nation in the world to ...

This report highlights the world-first achievement of Tokelau in using renewable energy sources (solar energy and coconut oil) for all its electricity. It explains why Tokelau decided to switch from using fossil fuels and includes comments from ...
