

Solar roof systems Denmark

Who is Danish Sun energy?

Today, DANISH SUN ENERGY is a leading system solution provider and specialists within the renewable energy sector, especially within PV Solar Plants. Financial Management. DANISH SUN ENERGY is headquartered in Noerresundby, Aalborg, Denmark and has a development/engineering team in Denmark, Kenya, Latvia, Lithuania and Spain.

What is Danish solar energy?

Danish solar energy releases the world's most efficient selection of colored solar modules. This ingenious technology is especially interesting for the building industry, where solar energy can be integrated 100% in the building so that roofs and facades in practice become energy producing.

How many PV solar systems has Danish Sun energy delivered?

The people/staff within DANISH SUN ENERGY has delivered more than 800 PV Solar Systems to the market, most of them within roof based projects from smaller residential systems to large scale projects.

Who makes Ennogie solar roofs?

See some selected references with Ennogie solar roof. Ennogie has by the year 2023 delivered more than 600 Ennogie solar roofs! Ennogie is the leading supplier of solar roofs in Denmark - and in the Nordics.

What is the first solar facade in Copenhagen?

THE FIRST SOLAR FACADE AT A LISTED BUILDING IN COPENHAGEN. A beautiful facade solution with red high-efficiency CFR solar cells in one of Copenhagen's many red stone properties. The first first red solar cell facade solution in Copenhagen, and probably the first in the world.

Why should you choose Ennogie solar roof?

Already within a few years of operation, the Ennogie solar roof will have reduced the CO₂ emission by more than the output from the production of the roof. Then, the roof just lays there and makes the world a better place. This means that you can use all the electricity generated, with a clear conscience.

We produce high quality photovoltaic BIPV solar systems for roofing "CFR" (color reflection form) applications and facades applications from Denmark, and have through the years been involved in numerous processes from Module ...

We produce high quality photovoltaic BIPV solar systems for roofing "CFR" (color reflection form) applications and facades applications from Denmark, and have through the years been ...

Our high technological factory in Denmark is built to provide flexibility to produce tailored BIPVs. We are proud of being the world pioneer in designing and producing Building Integrated ...

Ennogie solar roof has been chosen as the roofing solution for more than 70 apartments, in the new community of "Sønderhaven" in Brøndstrup, Denmark. With a total of more than 3500 m² ...

Due to the unique design of Timberline Solar(TM) as a complete roofing system, efficiency cannot be calculated in the same way as a traditional solar panel. The ES is made out of the same high-efficiency mono PERC cell technology found ...

Tailored & design Modules. Are tailored modules where solar panels are integrated in roofs, facades, shading louvers or directly integrated into the windows -- the BIPV products.. We love design and we are specialised in ...

Our high technological factory in Denmark is built to provide flexibility to produce tailored BIPVs. We are proud of being the world pioneer in designing and producing Building Integrated Photovoltaic Solutions (BIPVs). See more.....

Our "patented aesthetic solar modules, produced in Denmark, are probably the greenest and best in the world, in terms of colors, efficiency, quality and CO₂ emissions thanks to our LCA ...

This solution is excellent for all residential properties where you want a slate roof, our solar slate combines traditional roof systems and solar energy in one. ... Our "patented aesthetic solar ...

To mitigate land exploitation, building-integrated PV (BIPV) systems, such as solar roof tiles (SRTs), play a crucial role (Victoria et al., 2021; Virtuani et al., 2023).BIPV ...

Ennogie is the leading supplier of solar roofs in Denmark - and in the Nordics. Since the first Ennogie solar roof was installed in 2016, we have been delivering self-produced, sustainable electricity to many danish and german households, ...

Our "patented aesthetic solar modules, produced in Denmark, are probably the greenest and best in the world, in terms of colors, efficiency, quality and CO₂ emissions thanks to our LCA we have been able to optimize our production ...
