

Solar systems solutions Faroe Islands

Are there renewables in the Faroe Islands?

"In the Faroe Islands, we are blessed with renewables: we have wind, hydro and some sun in the summer; we also have tidal and wave power where we can see great potential," says Nielsen. Since announcing its green vision in 2014, SEV has already done a lot to increase the share of renewables in its energy mix.

Can the Faroe Islands be a smart microgrid?

"The energy system in the Faroe Islands is an impressive example of how all available energy resources can be integrated into a smart and innovative microgrid," says Vehkakoski.

Will the Faroe Islands use more green energy in 2025?

Even more conservative scenarios predict that the Faroe Islands' current electricity consumption of approximately 350,000 MWh per year will increase to approximately 450,000 MWh in 2025. "The current discussion recommends using more green energy and especially the potential for wind energy is quite high," says one of the islanders.

How old is the Faroe Islands photovoltaic system?

The Faroe Islands' first large photovoltaic system turns 2 years old. The plant is also the first major photovoltaic system in the Faroe Islands. The Faroe Islands' first large photovoltaic system turns 2 years old. The plant is also the first major photovoltaic system in the Faroe Islands.
