What is the XLinks Morocco-UK Power Project?

The Xlinks Morocco-UK Power Project will be a new electricity generation facility entirely powered by solar and wind energy combined with a battery storage facility. Located in Morocco's renewable energy rich region of Guelmim Oued Noun, it will be connected exclusively to Great Britain via 4000km (2485 miles) HVDC sub-sea cables.

How will Morocco - UK power project work?

The Morocco - UK Power Project will be powered by a wind and solar farm within Morocco's Guelmim Oued Noun region. The wind farm will utilise the reliable Trade Winds in the region, which are driven by the temperature differential between the Atlantic Ocean and African continent.

How will a 'zero-carbon electricity' project work in Morocco?

When domestic renewable energy generation in the United Kingdom drops due to low winds and short periods of sun, the project will harvest the benefits of long hours of sun in Morocco alongside the consistency of its convection Trade Winds, to provide a firm but flexible source of zero-carbon electricity.
