Solomon Islands was the site of numerous World War II battles between the United States and Japan, including the Battle of Guadalcanal. The nation still suffers from a lack of infrastructure and health and well-being initiatives, according to reports.

The new report finds that accelerated deployment of renewables and the uptake of energy transition innovative solutions in the Solomon Islands can address the challenges. To drive action towards accelerated energy transition, the government already aspires to achieve 100% electricity access and zero emissions by 2050.
