

Who is deep cycle systems?

Deep Cycle Systems Pty Ltd is a battery technology company located in Tamborine Mountain, Australia. We specialise in the design and manufacture of lithium battery related technologies such as Battery Management Systems, Cell Management Systems, DC-DC charging systems and solar regulators.

What is a DCS deep cycle lithium battery?

DCS deep cycle Lithium Batteries deliver safe lithium phosphate energy storage solutions for a wide variety of applications. They are a similar sized battery to lead-acid batteries, which makes upgrading to DCS Lithium Batteries a simple task, whilst offering six times the battery life and less than half the weight of lead-acid batteries.

What is a deep cycle lithium battery?

DCS have designed the Deep cycle Lithium Battery range to be more superior in every aspect with our uniquely bolted cylindrical cell design. This not only ensures the highest possible cell conductivity for long life - up to 5000 cycles at 100% depth of discharge (DOD), but also provides superior cooling performance.

Our 12v deep cycle systems battery is made with high-precision materials, delivering years of quality service. The good thing is that we manufacture maintenance-free lithium-ion batteries that have become the industry leader ...
