

Solpex energy Ivory Coast

Who is solpex energy?

Solpex Energy is a global project developer who creates wealth and added value, carrying out projects in the renewables sector. We focus on solar and wind power as a clean and inexhaustible energy source.

What stages of a project can solpex energy work at?

We have the capability to work at every phase of a project: early stages of development, feasibility, design, tenders, construction and asset management. Solpex Energy is a global project developer who creates wealth and added value, carrying out projects in the renewables sector.

Will Ivory Coast achieve 400 MW solar power by 2030?

Ivory Coast aims to produce enough renewable energy by 2030 to reduce its greenhouse gas emissions by 28%. Ivory Coast aims to reach 400 MW in generating capacity from solar power by 2030. The country is building the Boundiali Solar Power Station, which will have a capacity of 37.5 megawatt-peak (MWp).

Which companies are developing solar power plants in Ivory Coast?

The Egyptian company Elsewedy Electric is also among the potential developers of the Laboa and Touba solar plants. The same goes for Infinity Power Holding and Nareva Holding, the subsidiary of the Moroccan group Al Mada. The selected IPPs will build solar power plants capable of delivering 60 MWp to the national grid in Ivory Coast.

How many solar plants will Ivory Coast have?

The Ivory Coast's Ministry of Mines, Oil, and Energy has unveiled plans to build 12 solar plants with a total capacity of 678 MW. Mamadou Sangafowa Coulibaly, the Ivory Coast's Minister of Mines, Oil and Energy, has announced plans to install 678 MW of solar capacity by 2030 and 1,686 MW by 2040.

Will IPPs build solar power plants in Ivory Coast?

The selected IPPs will build solar power plants capable of delivering 60 MWp to the national grid in Ivory Coast. The solar plants are being built under the "Scaling Solar" program, an IFC initiative to leverage public-private partnerships (PPPs) for the rapid construction of solar power plants in developing countries, particularly in Africa.

Ivory Coast aims to increase its installed power capacity to 3.5 GW by 2025 and 8.6 GW by 2040. As part of this strategy, the country's Ministry of Mines, Petroleum and Energy signed a memorandum of understanding ...

Ivory Coast aims to increase its installed power capacity to 3.5 GW by 2025 and 8.6 GW by 2040. As part of this strategy, the country's Ministry of Mines, Petroleum and Energy signed a memorandum of understanding (MoU) with renewable energy company Kong Solaire earlier this month to construct a 50 MW solar power

plant in the Tchologo region.

The selected IPPs will build solar power plants capable of delivering 60 MWp to the national grid in Ivory Coast. The solar plants are being built under the "Scaling Solar" program, an IFC initiative to leverage public-private partnerships (PPPs) for the rapid construction of solar power plants in developing countries, particularly in Africa.

The company claims the Ivory Coast project will be Africa's first net zero emissions upstream project, with Scope 1 and 2 emissions mitigated through operational efficiency measures along with...

Ivory Coast also has a sedimentary basin rich in oil and gas resources. The commissioning of the Baleine deposit and the recent discovery of the Calao deposit strengthen its position on the ...

SummaryLocationOverviewOwnershipSee alsoExternal linksDivo Biomass Power Station, also Soden Biomass Power Station, is a c. 75 MW (101,000 hp) biomass-fired thermal power plant under development in Ivory Coast. Socié- des Energies Nouvelles, an Ivorian IPP is leading the development of this biomass waste-to-energy infrastructure project. The main fuel is intended to be cocoa bean shells, cocoa pod husks and "cocoa sweatings". The U.S. Trade and Development Agency (USTDA) has provided partial fund...

Oil and gas is becoming an increasingly strategic sector for Ivory Coast. The country has been expanding its existing crude oil production, with outputs of almost 60,000 barrels per day. Its ambition is to reach 200,000 BOE (barrel of oil equivalent) by 2020, as it pushes for foreign investment in offshore exploration.
