

South Georgia and South Sandwich Islands solar panel system cost

Are solar panels a good investment in Georgia?

Solar panel costs in Georgia have dropped by 54% over the past decade. The state offers unique solar incentives, targeting large-scale solar farms. Initial solar investment is substantial, but long-term savings and energy independence are significant benefits.

How much does a 5 kW solar system cost in Georgia?

While a 5 kW system will only cost you \$13,173 in Georgia, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Georgia?

How much do solar panels cost in Georgia?

On average, installing solar panels in Georgia costs about \$19,635 after taking into account the federal solar investment tax credit. That's roughly 17% more than the U.S. average of \$16,715. While solar panels in Georgia are relatively pricey, the savings over 25 years can add up to \$23,182. That can make it well worth going solar.

Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

Are solar panels tax deductible in Georgia?

Georgia does not offer state incentives for solar panels, but you can take advantage of the area's abundant sunshine. However, you can claim the 30% federal solar tax credit, which also applies to home battery systems. The U.S. Energy Information Administration gathers electricity price data for all states.
