Our skilled technicians and electricians work quickly and effectively to ensure that your property is covered. With our turnkey ...

A whole-house generator, or standby generator, functions by providing automatic backup power to an entire home during power outages. It's integrated into your home's electrical system and usually runs on natural gas or propane. When the generator detects a power disruption, it activates automatically.

Use our home generator size calculator to estimate what size of generator you'll need to ensure reliable backup power for your home. If you prefer to talk to a knowledgeable local dealer and get a free, no-obligation home assessment, we invite you to request a home generator consultation.

Whole house or home backup generators start at ~\$3,000 for a 10kW model and go up to around \$30,000 for a 150kW model. Most residential homes will need a 10-20kW generator. A popular 16,000 or 16kW whole house generator from Generac will put you back about \$4,200 (plus installation, which will cost several thousand dollars at a minimum).
