

Srcful energy gateway Iraq

Visit <https://app.Sourceful.io> to start pairing your Energy Gateway. Start by clicking the "Select Wallet" button to link your Solana Wallet. Connect your Solana Wallet, we recommend using ...

The Sourceful Energy Gateway is a user-friendly and innovative device designed to connect Decentralized Energy Resources (DERs) such as solar plants and battery storage to Sourceful's energy network. It enables users to participate in building a global virtual power plant (VPP) while earning rewards for their contributions.

With Srcful, you can be part of the solution. By building and connecting your own solar panels or batteries using our Energy Gateway, you can earn tokens and monetize your contributions. This is the first platform of its kind that enables home owners to participate in the energy market in a meaningful way.

Meet the Sourceful Energy Gateway - your solar panels' new best friend. This smart device quickly connects your solar plants or battery storage to our network through WiFi or Ethernet. Setup takes just minutes using our simple mobile app.

By getting a Srcful Energy Gateway, you can start validating green energy from your Distributed Energy Resource (DER) and earning tokens for contributing to the decentralized energy grid. To get started, visit our Hardware Vendor RAKwireless store and acquire an Energy Gateway.
