

Why is energy development important in Sudan?

Sudan faces many energy development challenges brought about by high electricity subsidy levels and climate-induced impacts on hydroelectric generation which has been decreasing at a rate of about 4% per year. Improving access to modern and affordable energy is a development priority for Sudan.

How can Sudan restructure its energy sector from Morocco?

One of the most useful strategies Sudan can adopt from Morocco is the use of new legislation and new policies to restructure the energy sector. This recommended adjustment could encourage future investments targeting renewable production and attract more foreign and local investors to participate in renewable production projects.

How much does electricity cost in Sudan?

As for Ethiopia, Sudan imports electricity at a price of 4.5 cents/kilowatt. In August 2021, the Minister of Energy and Petroleum declared that the Sudanese energy sector needed urgent maintenance and restructuring at a cost of \$3 billion, another indicator of the dire financial needs of the sector.

Where can I find information about energy in Sudan?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO₂ emissions for Sudan on the IEA homepage. Find relevant information for Sudan on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

How can Sudan transform its energy sector?

A comprehensive package of technical and financial assistance will be needed to transform Sudan's energy sector. This will involve the development of risk management strategies that effectively promote public and private investments into scaled-up sustainable energy solutions.

What is the energy situation in Sudan?

In the subsections that follow, an overview is provided of the energy situation in Sudan, covering the magnitude of its fossil and renewable energy resources, its energy supply and consumption patterns, and the progress that has been made in achieving SDG-7 target. Sudan is endowed with a significant amount of energy resources.

This article examines the reality of the RE sector in Sudan and argues that diversifying the range of energy resources exploited will solve Sudan's current energy sector problems. The article thoroughly examines and ...
