What products does SunPower manufacture?

From the initial business of making pipe supports, Sunpower went on to develop other related products such as pressure vessels in 1998 and heat pipes & heat pipe exchangers which are used in the recovery of residual heat in petrochemical, steel and chemical projects in 1999.

Who is SunPower & why is it important?

Sunpower scored another major breakthrough when it was appointed by the Engineering Headquarters of Qinghai-Tibet Railway under the PRC Ministry of Railway to be the lead corporation responsible for drafting the standards for the heat pipes used to protect the permafrost foundation underneath the railway.

What is SunPower's waste gas & energy recovery system?

In 2003, Sunpower successfully developed its environmental friendly waste gas and energy recovery systems, which are used to recycle residual heat and recover petrochemical by-products contained in flare gas generated in a petrochemical refinery or production process.
