

Is a solar-powered Grid a good idea in Timor-Leste?

With the new UN reforms, the United Nations in Timor-Leste, under the leadership of the Resident Coordinator has now started lighting the way with its solar-powered grid which has begun to give maximum dividends. A powerful 300 kWp photovoltaic system is producing 400,000 kWh of clean electricity annually, filling critical gaps in energy supply.

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

What does a solar technician do in Timor-Leste?

Technicians in Timor-Leste have experience in small-scale, off-grid solar energy systems. Commercial or industrial scale installations are more complex and appropriate technical capacity is scarce.

Can a solar energy system help Timor-Leste achieve the 2030 Agenda?

"In Timor-Leste, our road to the 2030 Agenda for Sustainable Development starts at home. Our solar energy system can be a model for other UN Country Offices to show how we can jointly, sustainably and effectively tackle greenhouse emissions while reducing operational costs and scale up support across the United Nations System.

How long did it take to install solar panels in Timor-Leste?

Caption: It took almost a year- from feasibility to completion - to see the solar panel installed at the UN Timor-Leste compound. A powerful 300 kWp photovoltaic system is producing 400,000 kWh of clean electricity annually, filling critical gaps in energy supply.

With the new UN reforms, the United Nations in Timor-Leste, under the leadership of the Resident Coordinator (RCO) has now started lighting the way with its solar-powered grid which has begun to give maximum dividends.
