Belize has a high solar potential and set a renewable energy mix target of 85% by 2033. Presently Barbados' energy mix is comprised of 53% renewable energy. Its electrical demand peaks at 104MW and its electricity prices are below that of most countries relative to the rest of ...

Belize's education system is based on the British model, as the country was a British colony for over a century. However, it has also been heavily influenced by the US academic syllabus, primarily through the Jesuits. The ...

At the equator, the sun is almost directly overhead, so solar panels should be installed at a relatively shallow angle, around 10-15 degrees. As you move further away from the equator, the sun's angle becomes more oblique, so solar panels should be installed at a steeper angle to capture more direct sunlight.

Belize (/ b ? ' l i : z, b ?-/ (i), bih-LEEZ, beh-; Belize Kriol English: Bileez) is a country on the north-eastern coast of Central America is bordered by Mexico to the north, the Caribbean Sea to the east, and Guatemala to the west and south.
