The report highlights the issue that not only is Cuba's energy infrastructure in a precarious state of aging and disrepair, but also that its entire energy system relies heavily on external aid and imported fossil fuels.

This is the work of the The Sussex Energy Group. We undertake academically rigorous, inter-disciplinary research that engages with policy-makers and practitioners. The aim of our research is to identify ways of achieving the transition to sustainable, low carbon energy systems whilst addressing other important policy objectives such as energy ...

The worldwide reliance on burning fossil fuels to create energy could be phased out in a decade, according to a major energy think tank in the UK. A research group based at the University of Sussex, focusing on transitions towards sustainable, low-carbon energy systems.
