Media Briefing For decades, a sobering story has been largely hidden behind headlines around global warming: Even if the world began to get serious about cutting planet-heating pollution (it isn't yet), there are places where even climate adaptation will not suffice and communities will need to withdraw from climatic and coastal danger zones.

In line with this study, their C maps show high potential for SOC storage on land in Colombia's Eastern High Plains. Our scenario analysis confirmed their estimates, showing several land-use conversions that could both increase productivity and reduce net carbon emissions . The scenario changes to the ~1 million ha study area could reduce ...

In this context, green hydrogen represents a key energy carrier enabling the storage of renewable energy as well as directly powering industrial and transportation sectors. This work explores the realistic potential of the main renewable energy sources, including solar photovoltaics (8172 GW), hydropower (56 GW), wind (68 GW), and biomass (14 GW).

Enel has unveiled the first battery energy storage in Colombia at the Termozipa thermal power plant about 40km north of Bogotá. The 7MW/3.9MWh storage system, constructed over 20 months at a cost of more ...
