

Svalbard and Jan Mayen where to buy solar panel

Where are Svalbard and Jan Mayen located?

The islands are located north and northwest of Norway, within the southern limits of Arctic sea ice -- the northernmost point of Svalbard is within a 620 mi (1,000 km) of the North Pole. Svalbard is approximately 24,570 square mi (63,000 square km); Jan Mayen is approximately 145 square mi (373 square km).

Could a new solar project help remote Arctic communities transition to green energy?

Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago, a region plunged in round-the-clock darkness all winter. The pilot project could help remote Arctic communities transition to green energy.

How many people use the Internet in Svalbard and Jan Mayen?

According to Kepios analysis, 37.0 percent of the population in Svalbard and Jan Mayen, or 944 people, did not use the Internet at the beginning of 2022. This means that approximately the remaining 63.0 percent, or 1,338 people, used the Internet.

Where are the world's northernmost solar panels installed?

Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago, despite the region being plunged into darkness from early October until mid-February every year. Norway has installed the world's northernmost ground solar panels in its Svalbard archipelago, a region plunged in round-the-clock darkness all winter.

Where is a solar farm located in Norway?

State-owned energy company Store Norske Energi installed the solar and storage at Isfjord Radio on the island of Spitsbergen, the largest and the only permanently populated island in the archipelago, and the solar farm is expected to come online tomorrow.

Does Isfjord Radio have a solar farm?

The off-grid Isfjord Radio's new ground-mounted solar farm joins its rooftop solar, which was installed earlier this year. The ground-mounted solar farm sits at 78°17'N; north, which makes it the world's northernmost solar farm. Store Norske hasn't yet provided details on the specs of the solar panels or battery storage.

Svalbard is approximately 24,570 square mi (63,000 square km); Jan Mayen is approximately 145 square mi (373 square km). Svalbard is an island group consisting of nine main islands: Spitsbergen (the largest), Nordaustlandet, ...
