

Syria solar panel kit for outdoor lighting

As part of the UNPD (United Nations Development Program) aid projects, we have supplied 1420 sets of solar street lights to Syria. These solar street lights not only light up the streets, but also the local population's hope for a good life in the future.

The all in two solar street light system can be easily scaled and customized to meet various lighting requirements. It's perfect for large-scale projects and diverse outdoor environments, offering tailored lighting solutions.

Solar panels in Syria have shone a light on a dark corner of the country. In the Syrian province of Idlib, locals and refugees shield their eyes from the sun glinting off their solar panels. Even though solar panels are considered a luxury across the globe, the area of war-torn Idlib is full of solar panels.

The solar panel project is a new sustainable long term solution. Help us provide or repair solar panels to Syrian families after the earthquake! 2/3 hours of electricity a day. Public electricity is enough for 4 lightbulbs, or 1 lightbulb and a fridge, to work for, just two hours.
