

Tesla has agreed to buy nickel from a mine in New Caledonia in a move to secure its supply of the battery metal, which its chief executive Elon Musk has called the group's "biggest concern."

By securing nickel in places like New Caledonia or Australia, then sending the mineral directly to its own battery-making facilities, Tesla would be able to reduce its shipping carbon...

Our grid-scale batteries and software controls store and dispatch this energy, creating a more stable and sustainable grid. We can lower lifecycle costs and deliver reliable energy for utilities and developers alike by combining hardware, software, ...

In their ongoing efforts to acquire more nickel for production of their electric vehicle (EV) batteries, Tesla became a technical advisor at the Goro mine in New Caledonia earlier this year. As part of the agreement, Tesla ...

New Caledonia is at the center of a key test over whether Western car makers can sidestep China's dominance over battery power and establish sustainable practices. Tesla, through a partnership with a large New Caledonia nickel mine, will directly source much of the key material, a major step in a broader effort by the company to take control of...

Tesla is poised to become a technical adviser at the massive Goro mine in New Caledonia, as the electric car maker extends its efforts to acquire more nickel for its battery initiatives.

New Caledonia holds a quarter of the world's nickel resources, a critical material for EV batteries and companies like Tesla rely on its mines to fuel the green transition. The ...

In their ongoing efforts to acquire more nickel for production of their electric vehicle (EV) batteries, Tesla became a technical advisor at the Goro mine in New Caledonia earlier this year. As part of the agreement, Tesla became part of a "technical and industrial partnership" with the owners at the time, Brazilian mining firm Vale .

The safety and reliability of Megapack is our responsibility. We work hard to ensure that only the best products are being produced and shipped to customers worldwide. Help establish and enforce Tesla's high quality standards. [View Quality Assurance Jobs](#)

By securing nickel in places like New Caledonia or Australia, then sending the mineral directly to its own battery-making facilities, Tesla would be able to reduce its shipping ...

Tesla solar batteries New Caledonia

New Caledonia holds a quarter of the world's nickel resources, a critical material for EV batteries and companies like Tesla rely on its mines to fuel the green transition. The island is home to thousands of endemic species, many of which are found nowhere else, yet nickel mining is razing rainforests that took centuries to grow.
