

# Tessera solar and stirling energy systems Uruguay

An overview of the breakthrough SunCatcher solar power system. This is a new, utility-scale solar power technology designed and manufactured by Stirling Energy Systems and deployed by its sister company Tessera Solar

Tessera Solar is responsible for deployment of the SunCatcher(TM) solar dish Stirling system, the solar electricity generation technology that is manufactured by our sister company SES Inc., headquartered in Scottsdale, Arizona.

Only four months after breaking ground, Tessera Solar and Stirling Energy Systems (SES) recently showcased the highly anticipated Maricopa Solar power plant, which is the first commercial project for the SunCatcher concentrating solar power (CSP) technology.

The company said that the modular concentrating solar-thermal power (CSP) SunCatcher system uses precision mirrors attached to a parabolic dish to concentrate the sun's energy onto a stirling NS Energy is using cookies

Four months after breaking ground, NTR's Tessera Solar and Stirling Energy Systems (SES) unveiled the 1.5-megawatt (MW) project for key partners, stakeholders and media. Maricopa Solar is the first commercial project for the SunCatcher concentrating solar power (CSP) technology designed and manufactured by SES.

Only four months after breaking ground, Tessera Solar and Stirling Energy Systems (SES) showcased the highly anticipated Maricopa Solar power plant today at a special event for key partners, stakeholders and media.

Tessera Solar has received federal approval to build two massive solar power plants on public lands, but the company is struggling to find funding, according to several reports. Tessera Solar is the developer and sister company to Stirling Energy Systems, which makes a unique style of solar thermal power unit, called the Sun Catcher.
