

How many solar panels are installed in the Netherlands?

Currently (2020) there are about 24 million panels installed in the Netherlands and this amount is still increasing rapidly. Growing environmental awareness, falling prices of solar panels and low interest rates ensure rapid growth. Together, these panels account for 7,000 MWpik. That is 5% of the total electricity production in the Netherlands.

Are solar panels a good investment in the Netherlands?

An average-sized installation of 12 solar panels produces about 4000 kWh a year when you are buying solar panels in the Netherlands. With electricity prices at 30 cent p. kWh, that's EUR 1200,- saved. An installation of EUR 5500,- means an RUI of less than 5 years. There are very few investments which are this safe with the same RUI.

How much do solar panels cost?

In addition, the specifications of the panels (such as power) and the cost of installation also play a role. On average, you pay around EUR500 to EUR600 per solar panel, including installation. The cost of solar panels depends on the number of panels and the power per panel. In general, the more panels you buy, the cheaper the price per panel becomes.

How many solar panels does a Dutch House need?

The number of solar panels needed for your home also depends on a few factors, including: The average home installation falls between 10 to 12 solar panels, which would partially power the average Dutch house with solar energy. Solar panels can cover your entire roof in the Netherlands, depending on your energy needs. Image: Freepik

How do I get a tax return for solar panels in the Netherlands?

In the Netherlands, where the VAT is 21% on regular items, this means that people save an additional 1/5th of the price on their investment. To be awarded this return for buying solar panels in the Netherlands, you must apply to the tax office to change your status to a business owner.

Why is the Dutch government losing money on solar panels?

Because solar panels have become an extremely popular investment, the Dutch government is losing money by compensating everyone who sells their energy into the grid. Originally, the Netherlands was going to shift to the terugleververgoeding policy in 2031, after salderingsregeling ended.
