

The solar warehouse Somalia

Can solar power help businesses in Somalia?

According to the World Bank, through the Somalia Business Catalytic Fund, solar company Solargen was able to begin an initiative to provide affordable solar power access to vendors, businesses and other entities in the town of Warsheikh and create more than 2,200 jobs through these businesses.

How much does energy cost in Somalia?

Depending on the region, the price can vary from \$0.30 per kWh to \$1.00 per kWh, starkly contrasting neighboring Ethiopia's price of \$0.06 per kWh. The scorching and consistent sunshine combined with ideal windy conditions means Somalia holds great renewable energy potential.

What happened to the energy infrastructure in Somalia?

When the 1991 uprising threw Somalia into a lasting civil war, the nationalized energy infrastructure was completely privatized overnight without regulation. What happened immediately was a total blackout with almost no electricity accessible to the country.

How can BECO's new solar power plant help Somalia?

Because Somalia struggles with a lack of electricity and high electric costs, BECO's new solar power plant has the potential to positively impact many people's lives. When it opened, the power plant had the capacity to produce 8 MW.

Is there a solar power plant in Mogadishu?

In June 2020, Somalia's largest electricity provider, BECO, announced the opening of a new solar power plant in the capital city of Mogadishu. BECO is the only company that provides electricity for Mogadishu, Afgooye, Balad, Barawe, Kismayu, Marka, Jowhar and Elasha.

Can BECO's solar power plant lift Somalis out of poverty?

BECO's solar power plant could have a significant impact on Somalis, lifting many out of poverty. Lack of access to electricity is widely cited as a large contributor to poverty. Without electricity, families don't have a non-polluting source of energy for cooking. Refrigerators are unusable. Children can't do their homework after dark.
