

Timor-Leste inspired energy smart battery

Will CNNP move into the solar market of Timor-Leste?

The renewables unit of China National Nuclear Power (CNNP) is considering a move into the solar market of the Southeast Asian market of Timor-Leste, two sources told Infralogic. CNNP Rich Energy is interested in taking part in an international tender to develop a solar plus battery energy storage system, they said.

Can a Timor-Leste solar power plant be financed?

The tender, which was announced in February this year by state utility Eletricidade de Timor-Leste, is seeking an investor that can design, finance, operate and maintain a 72-85 MW solar power plant and a 36-43 MW battery energy project under long-term purchase agreements with the state grid in the capital city of Manatuto, the sources said.

Why does Timor-Leste have a high electricity cost?

The cost of electricity supply in Timor-Leste is higher than in neighbouring countries because of the utility's slow transition from expensive diesel generation to renewables, high technical losses, and wasteful consumer use of energy because of a lack of metering infrastructure. Have you read?

How will the ADB help Electricidade de Timor-Leste?

In Southeast Asia, Electricidade de Timor-Leste has secured funding from the Asian Development Bank (ADB) to modernise its grid network with smart meters and smart grid technologies. The utility will use a \$35 million loan from the ADB to ensure its grid network is resilient enough to power consumers in 12 municipalities.

How long will the integrated power facility last in Timor-Leste?

The duration of the integrated power facility will be about 25 years, and the bid deadline is 1 May. Renewables account for only 8% of the total electricity supply in Timor-Leste, with 99% of that coming from bioenergy and 1% from solar, according to a report issued by the International Energy Agency last year.

Who bids for solar IPP project in Timor-Leste?

For Timor-Leste, bidders are typically from legacy countries such as Indonesia, Portugal and People's Republic of China. For the Solar IPP project, Government of Timor-Leste represented by the Ministry of Finance has provided backstop guarantee for EDTL obligations under the Implementation Agreement.

The utility will use a \$35 million loan from the ADB to ensure its grid network is resilient enough to power consumers in 12 municipalities.

Timor-Leste inspired energy smart battery

We specialize in providing high-performance lithium-ion smart batteries tailored for OEMs. Our batteries are designed with exceptional reliability, durability, and safety in mind, making them ...

ADB aid to facilitate the rollout of 140,000 smart meters in Timor-Leste. Smart metering, digitisation and automation will be the only way that utilities operators will meet government targets.

This Technology Transfer Advances Timor Leste's Nationally Determined Contribution to achieve higher efficiency and less carbon emissions from power generation through the use of (pico/micro-hydro), biomass, biogas, solar PV, wind power at different scales, natural gas power generation, etc.

An innovative off-grid solar battery system that would provide autonomy from the unreliable grid and the capability to generate and store electricity independently. Critical facilities such as security lights, water pumps, fans, and other electricity-dependent amenities remained non-operational, leaving the adults and children in the dark.

Explore solar project in East Timor (Timor-Leste), delivering sustainable and reliable energy solutions. Learn about our commitment to renewable energy and how we're helping communities thrive with clean power.

On Australia's doorstep, a distinct energy narrative is unfolding. The wide-spread destruction of infrastructure by Indonesian militias in 1999 and prior has severely impeded Timor-Leste's human and economic development for more than two decades.

We specialize in providing high-performance lithium-ion smart batteries tailored for OEMs. Our batteries are designed with exceptional reliability, durability, and safety in mind, making them ideal for powering critical applications.
