

Titan solar panels South Sudan

Who is Titan solar power?

Titan Solar Power was founded in March 2013 in Mesa, Arizona, and has since become one of the fastest growing solar installers in the southwestern United States, with further plans to expand across the South and Midwest regions of the country. Its current active markets covers solar installation projects in the following states:

How long does solar energy last in South Sudan?

Proponents of solar energy argue that a solar system can produce reliable electricity for about 25 years. Having recognised solar energy potential, South Sudan is expected to put more emphasis on development of solar energy sector as part of its fight against energy poverty and economic diversification.

How solar energy can transform South Sudan's economy?

A solar energy can also be transformative to South Sudan's economy. For example, solar energy is affordable, cleaner and last longer as compared to energy from diesel-powered generators because generators need diesel to burn and they also need to be replaced after few years.

Does Titan solar power sell solar panels?

In addition to LG solar panels and the LG Chem solar backup battery, Titan has also formed a partnership with a leading solar panel manufacturer in Silfab. This partnership has made Titan Solar Power one of the few solar installers in business that sells privately labelled solar panels.

Why is solar energy important in South Sudan?

As characterised by ample sunshine with strong solar power potential, South Sudan remains as one of key destinations on African continent for solar energy investment. In addition to this, it has been documented that evolution of solar PV is of great significance in South Sudan.

Does South Sudan have a fight against energy poverty?

The good news is that South Sudan has already started its fight against energy poverty and one evidence for that is the ongoing construction of Nesitu 20MWp PV Solar +35MWh BESS power plant at Nesitu, Juba.
