Why is a photovoltaic system important in Czechia?

"It is very important because many people have made investments to the photovoltaic system," Preisinger said. Stepan Chalupa, president of the Czech Renewable Energy Chamber, said that Czechia's energy market is continuously improving but better regulations are needed to prohibit fraudulent providers from operating.

Will Czechia reach its solar potential?

As Czechia reaches its solar potential, with impending changes to the country's legislative landscape ushering in greater utility-scale solar array rollouts, over 5,000 attendees - government ministers, industry experts, and key business stakeholders - descended on Prague this week for the 2023 Smart Energy Forum.

Will solar power ever eclipse nuclear power in Czechia?

Robert Sedmera, a sales representative for Austrian PV manufacturer Fronius, told pv magazine that the company has operated in Czechia since 1991. He said he does not believe the country's solar capabilities would ever eclipse nuclear, but noted that the public appetite is leaning more towards solar and cheaper electricity prices.

How much solar power does the Czech Republic have in 2022?

As the central European nation clocked in 2,627 MW of installed solar PV capacity at the end of 2022 - which is 426 MW up from the previous year, according to estimates published by the International Renewable Energy Agency (IRENA) - the Czech Republic's continued achievement of these solar gains was on the lips of most attendees.
