

We carry out installation of solar power plants for over 14 years. We employ only certified and highly qualified specialists. We provide free service for the first year!

The Swiss Federal Office of Energy has been surveying the solar market in Switzerland for more than 20 years. Due to this long experience the quality of the data has been maintained, thanks ...

Secure the best-priced solar power plant for your company in Switzerland. Our cutting-edge solar systems are designed to meet the unique energy needs of businesses, offering cost-effective ...

In Switzerland, you'll typically encounter three main types of solar panels: monocrystalline, polycrystalline, and thin-film. After researching and chatting with friends who have invested in these systems, I discovered that each type possesses its ...

Another step towards improving Swiss Solar products and increasing their efficiency was the launch of in-house designed bifacial panels. Combining in their design the mentioned above technologies PERC, Half Cell and Bifacial cell, these modules have shown significant progress in the global PV markets over the past five years.

The process often includes solar photovoltaic (PV) systems, which are becoming more affordable than ever before. A flat rooftop, common among industrial & logistics (I& L) buildings, lends ...

The Swiss Federal Office of Energy has been surveying the solar market in Switzerland for more than 20 years. Due to this long experience the quality of the data has been maintained, thanks as well to all the installers and distributors who are willing to complete the annual questionnaire.

In Switzerland, you'll typically encounter three main types of solar panels: monocrystalline, polycrystalline, and thin-film. After researching and chatting with friends who have invested in ...

TOP PERFORMANCE SOLAR MODULES. Higher yield per surface area, lower BOS costs, higher power classes, and an efficiency rate of up to 22.45%. IBEX TOPCON Technology supercharges ordinary crystalline solar cells and modules and does not involve a complex new cell design, nor does it require special system components.

The process often includes solar photovoltaic (PV) systems, which are becoming more affordable than ever before. A flat rooftop, common among industrial & logistics (I& L) buildings, lends itself easily to solar panels, helping I& L property owners and tenants to reach decarbonisation goals.

Types of commercial solar panels Switzerland

Secure the best-priced solar power plant for your company in Switzerland. Our cutting-edge solar systems are designed to meet the unique energy needs of businesses, offering cost-effective and eco-friendly power generation.
