

# T&#252;rkiye tubewell solar scheme

How to apply for solarization of tubewells?

A massive awareness campaign will be launched for solarization of tubewells. An advertisement will be published in print media for submission of application by the farmers. Application form will be available in the Deputy Director Agriculture (Water Management) office and will submit application in the same office.

What is T&#252;rkiye's energy policy?

T&#252;rkiye's primary objective for the energy sector, as presented in the 12th Development Plan, is to maximize self-sufficiency by using domestic and renewable energy resources, based on the 2053 net zero emission goal, along with uninterrupted, high-quality, sustainable and secure supply of energy at affordable costs.

What is the energy supply in T&#252;rkiye?

As of 2021, T&#252;rkiye's total energy supply was met by natural gas (31 percent), oil (27 percent), and coal (25 percent), while energy supply from wind, solar and other renewable energy sources accounted for 16 percent.

How has energy fueled growth and development in T&#252;rkiye?

Energy has fueled remarkable growth and development outcomes in T&#252;rkiye. The economy's energy-intensity and the carbon-intensity of electricity production to date come with significant costs and risks. Transformative opportunities remain to be tapped in renewables, energy efficiency and electrification, building on remarkable recent progress.

Does T&#252;rkiye have a coal lock-in?

T&#252;rkiye's 2022 National Energy Plan targets a further tripling or more of solar and wind capacity over the next decade to achieve 82.5 GW of total solar and wind generation capacity by 2035, adding around 60 GW between now and then. However, T&#252;rkiye has a substantial coal lock-in outlook, with a large pipeline of coal capacity (32 GW in 2020).

What is the future of energy in T&#252;rkiye?

Transformative opportunities remain to be tapped in renewables, energy efficiency and electrification, building on remarkable recent progress. Approximately 70 percent of (gross) greenhouse gas emissions in T&#252;rkiye are energy-related, including from power, industry, transport and buildings.

Turkey's rapid shift to greener sources of energy has led to a sharp rise in its installed solar power over the last decade, with renewable investments expected to accelerate in the period ahead. ...

MNRE is promoting Solar or DRE through various schemes. Residential Rooftop Solar subsidy Scheme under MNRE RTS Phase-II and PM KUSUM Yojna are few of them. For rooftop solar installations above 3 KW
