

How will Germany and the EIB help Ukraine regain energy independence?

Germany, the EIB and Ukraine have announced a EUR20 million grant for the Renewable Energy Solution Program to boost the energy independence of Ukrainian municipalities. The grant supports hospitals and schools across Ukraine, aiding renewable energy implementation as part of green reconstruction.

Does Germany support Ukraine's energy sector?

Germany has provided over EUR200 million to support Ukraine's energy sector in the last year alone. Ukraine is a priority country with which the International Climate Initiative (IKI) maintains particularly close cooperation.

How much money has URC24 contributed to Ukraine's energy sector?

The Group has so far been able to mobilize more than USD 5 billion in support of Ukraine's energy sector, including more than USD 1 billion committed since URC24 in June as a reaction to the intensified Russian attacks.

Does Ukraine need a new energy system?

The war in Ukraine, which has caused immense suffering and resulted in the destruction of critical infrastructure, demands urgent action to rebuild the country and its energy system. Today, Ukraine heavily depends on fossil fuels, which accounted for some 70% of its primary energy supply in 2020.

Will Ukraine become self-sufficient in terms of primary energy?

The report envisions a scenario of shift towards domestic renewables and low-emission technologies, which would make Ukraine self-sufficient in terms of primary energy, reaching 98% by mid-century. This transformation would not only contribute to energy security but also mitigate the impact of regional and global energy crises on Ukraine.

Is the Ukraine energy support fund restoring domestic generation capacity?

While the Ukraine Energy Support Fund is currently restoring and installing 2 GW of domestic generation capacity ahead of winter, a significant gap to cover the restoration needs still remains. We therefore encourage the international community to continue contributions.

This dialogue launches a cooperative platform with an emphasis on accelerating Ukraine's energy transition and EU integration while protecting Ukraine's energy security. "Today we mark an important step forward in the U.S. government and the Department of Energy's support for Ukraine's energy needs," said Secretary of Energy ...

Roman Andarak, Deputy Minister of Energy of Ukraine, highlighted in his speech that energy independence is currently a task for the entire society. "Systematic attacks on energy infrastructure are the greatest challenge.

More than a thousand attacks confirm that the energy sector has become a targeted focus of aggression," he said. Particularly dangerous are strikes ...

By embracing energy efficiency improvements and electrification, Ukraine could dampen demand growth and achieve a significant decrease in energy intensity, of up to 60% by 2050. Decarbonization efforts ...

Developing strategies, frameworks and legislation to improve energy efficiency and to enable the ramp-up of decentralised renewable energy solutions in line with EU Acquis, ESG criteria and climate-risk assessment, e.g. in the area of wind, solar, hydrogen and sustainable biomass;

6 ...; Ukraine's potential as a huge source of renewable energy makes this battle even more important. With the confidence of international investors and partners behind us, Ukraine can become a green energy hub for Europe as President Zelensky has suggested. In a world where renewable energy capacity grew by 50% globally last year, Ukraine has the space, skills, ...

The event underscored the urgency of adopting decentralised, renewable energy solutions for Ukraine. Drawing from these countries' successes, Ukraine can build resilient energy systems that ensure independence, reduce emissions, and foster economic growth. Key points of speakers

3 ...; The United Nations Development Programme (UNDP) in Ukraine has delivered six gas-piston cogeneration units to the city of Kharkiv as part of the Green Energy Recovery ...

3 ...; The United Nations Development Programme (UNDP) in Ukraine has delivered six gas-piston cogeneration units to the city of Kharkiv as part of the Green Energy Recovery Programme. This initiative is designed to address the city's critical energy needs and was made possible through the support of the governments of Norway, Sweden, and the European ...

BEX flota, koja svaku noć saobraća sa 39 teških kamiona, koristi CNG kako bi smanjila emisije četirih gasova i aktivno doprinosi boljoj životnoj sredini. Takođe, planiramo da testiramo potpuno električni kamion za teški teretni transport, što će nam omogućiti da dobijemo detaljniju sliku o efikasnosti i održivosti različitih ...

BEX flota, koja svaku noć saobraća sa 39 teških kamiona, koristi CNG kako bi smanjila emisije štetnih gasova i aktivno doprinosi boljoj životnoj sredini. Takođe, planiramo da ...

By embracing energy efficiency improvements and electrification, Ukraine could dampen demand growth and achieve a significant decrease in energy intensity, of up to 60% by 2050. Decarbonization efforts across all sectors would be essential in ...

Ukraine's Energy Strategy until 2050 outlines investment opportunities amounting to US\$383 billion, with its focus on clean energy production and system resilience. Private sector involvement is being encouraged in renewable energy projects, smart grids and energy-efficient technologies.
