

Who is vas group?

The first VAS Group company was founded by the engineer Norbert Thurner in 1989. The name VAS continues to stand for innovation and entrepreneurship even to this day. We are a one-stop provider of solid fuel-fired plants for generating heat and electricity.

Who is vas?

VAS designs, builds and maintains systems for the generation of heat and power in the range of 2 to 25 MW for private, industrial and public-sector customers. Since the company was founded in 1987, we have grown continuously, further refining and perfecting our knowledge regarding energy generation from biomass.

What does Vas stand for?

The name VAS continues to stand for innovation and entrepreneurship even to this day. We are a one-stop provider of solid fuel-fired plants for generating heat and electricity. We plan, build and maintain systems in the range of 2 to 30 MW for private, industrial and public-sector customers.

What does Vas do?

We plan, build and maintain systems in the range of 2 to 30 MW for private, industrial and public-sector customers. The VAS Group currently consists of six companies, all of which are united by one common goal: to constantly offer our customers more. We are technology leaders in environmental, combustion and process technology.
