

Sunfire, a global leader in the development and production of industrial electrolyzers, has secured EUR109 million (\$125 million) of new funding in its Series D round from a consortium of investors led by Lightrock and Planet First Partners, and including Carbon Direct Capital Management, HydrogenOne Capital, and existing shareholders.

The role of SMS group and Paul Wurth in this partnership is to support Sunfire in capacity building and technology development, and to cooperate in the implementation of complete turnkey projects. With over 150 years of experience, SMS group functions as an access provider to the global metals industry, which increasingly uses renewable hydrogen.

Sunfire strives to become the leading European manufacturer of electrolyzers and by this a key player in the field of renewable hydrogen, gases and fuels. Sunfire develops and manufactures steam-electrolyzers (SOEC). They produce hydrogen or syngas using renewable electricity.

In order to provide our customers at the same time a solution enabling hydrogen production in the most efficient way, SMS group participates as investor in the start-up company Sunfire via our subsidiary Paul Wurth. We are convinced that high-temperature electrolysis (HTE) ...

SUNFIRE aims for the industrialisation of liquid fuels and methane from renewable electricity, CO₂ and H₂O. Sunfire builds upon a technical process developed and filed as a patent by Dr. Bodo Wolf (founder of CHOREN, Freiberg, Germany). From 2008 - 2010, SUNFIRE has conceptually planned and conducted

What is Sunfire's current revenue? The current revenue for Sunfire is . How much funding has Sunfire raised over time? Sunfire has raised \$675M. Who are Sunfire's investors? Ahren Innovation Capital, Carbon Equity, Eurazeo, FSF Beteiligungs, and Global Innovation Consulting are 5 of 24 investors who have invested in Sunfire.

Sunfire GmbH is an innovative company at the forefront of the energy transition, specializing in high-efficiency electrolyzers designed for green hydrogen production. Their technologies, including the Sunfire-HyLink Alkaline Electrolyzer (AEL) and Solid Oxide Electrolyzers (SOEC), enable the production of hydrogen from renewable electricity ...
