

Lithium Metal is the most energy dense way to store lithium within a battery. Although battery capacity is cathode limited, starting with a thin layer of lithium as the anode transitions the battery from a lithium deficient system - such is ...

Energex batteries are the clear choice in terms of performance and reliability. Energex batteries are manufactured using antimonial and calcium hybrid plate technology, optimized active ...

Energex Lithium-ion is a premium range of the highest quality (LiFePO₄) composition. An internal battery management system (BMS) ensures all cells are uniformly charged and discharged, as ...
