

Vietnam rga systems

Who is RGA?

RGA is a global industry leader, specializing in life and health reinsurance and financial solutions that help clients effectively manage risk and optimize capital. We are widely recognized for superior risk management and underwriting expertise, innovative product design, and dedicated client focus. Find Solutions

Who is rgax?

In addition, RGAX is a wholly owned subsidiary of RGA set up in 2015 with a focus on building and accelerating transformational businesses in the life insurance industry. Partnering with RGA means access to innovation and thought leadership that ties in with growth and sustainability.

What is RGA central?

RGA Central is a convenient client portal that provides a single point of access to exclusive applications and insights. At RGA, we are eager to speak with clients and counterparties. Contact us to learn more about the resources, solutions, and services available.

What services does RGA offer?

RGA also offers a host of value-added services, including support in experience studies, Business Solutions Workshop, Voice of the Channel research, and process and underwriting reviews, to name a few.

What makes RGA different?

Experience the difference RGA makes. RGA's Americas operating segment is the company's largest. The segment includes operations in Canada, the United States, and Latin America.

What are the applications of Hiden RGA?

Applications include : Hiden RGA series of residual gas analysers provides routine, fast, wide dynamic range residual gas analysis.

The Agilent Micro GC Refinery Gas Analyzer (RGA) is a four channel, multi-dimensional system that includes a micro-machined injector, capillary column, and thermal conductivity detector optimized for specific RGA analytes, with total analysis cycle time of less than three minutes.

Ensuring to meet the customers' requirements of good quality makes our core value at RGA. RGA maintains stringent quality control norms with pre production tests of raw material, continuous in process checks and post production testing in our in house laboratory. This ensures 100% defect free goods sold to the customer.

Special Hiden RGA Configurations RGA for MBE: HALO 201 MBE o Constructed from compatible materials and designed for prolonged use in MBE environments. o Includes molybdenum wiring in place of copper and a contamination resistant ion source shroud. o Applications include semiconductors, solar cells,

oxides, etc.

The Hiden RGA series quadrupole mass spectrometers provide for routine, fast, wide dynamic range residual gas analysis, measuring the partial pressures of the species that are critical to vacuum quality and process requirements. Applications include : Vacuum chamber leak detection; Vacuum quality measurement and

monitoring; Virtual leak detection

The Reecotech company is the sole distributor of Hiden Analytical's residual gas analysis (RGA) system in Vietnam. The RGA system is a quadrupole mass spectrometer that is designed to analyze gas types using data collected in real time to give users instantly updated data on the status and partial pressure prediction of residual gas in a vacuum.
