

Welion battery Thailand

Where is welion battery made?

WeLion says it has produced the first semi-solid-state battery cell at its battery factory in Huzhou in East China's Zhejiang province. The cells are to be used in Nio's future 150 kWh pack. It is therefore hardly surprising that Nio's Senior Vice President Zeng Shuxiang also attended the ceremony in Huzhou.

What is a welion battery?

WeLion's chief scientist and founder, Li Hong, stated at the time that the battery was a hybrid solid-liquid electrolyte battery that was expected to have an energy density of 360 Wh/kg. The company had completed the construction of its Huzhou plant within a year.

When did welion start building a battery plant?

WeLion began construction of its Huzhou battery site in 2021 and completed construction of the plant and production line after a year, said Tian Qiyu, general manager of the company's Huzhou branch at the time. [READ the latest Batteries News shaping the battery market](#)

Will Nio get 150 kWh batteries from welion?

Nio starts to get cells from WeLion, as deliveries of 150-kWh batteries set to begin in Jul. Nio's (NYSE: NIO) semi-solid-state battery supplier began delivering high-energy-density cells to it as the Chinese electric vehicle (EV) maker is set to begin delivering them to vehicle owners later this month.

Will Nio deliver battery cells to welion?

The delivery of the battery cells to Nio is an industry-wide milestone event, the result of more than two years of joint team efforts between Nio and WeLion, WeLion chairman Yu Huigen said at the delivery ceremony. [What about we co-host a webinar?](#)

Where is welion based?

WeLion also announced at the delivery ceremony that it has officially opened the company's R&D center for Yangtze River Delta in Huzhou. WeLion is headquartered in Beijing and has four production sites in Fangshan, Beijing; Liyang, Jiangsu; Huzhou, Zhejiang; and Zibo, Shandong, according to its press release.
