

Are solar panels suitable for a detached home?

Contact us Solar panels are suitable for the roofs of detached homes regardless of the type of roof. Our system components have been selected especially for Finnish conditions, with specific mounting systems for different roof types. Our solar panel packages are always tailored according to each customer's needs.

What is a sunroof roof?

The most efficient solution on the market, providing independence from rising electricity prices and translating into greater savings. Cheaper than a regular roof plus PV panels, SunRoof is an economical and aesthetically pleasing solution.

How can a solar roof help UNICEF in Ukraine?

Help UNICEF's work with children and families in Ukraine. SunRoof manufactures 2-in-1 solar roofs and innovative fa&#231;ades that generate electricity without having to install traditional photovoltaic modules. This is the best replacement for a regular roof, offering the highest efficiency, the lowest carbon footprint, and a unique aesthetic.

Is sunroof a good choice?

Cheaper than a regular roof plus PV panels, SunRoof is an economical and aesthetically pleasing solution. Swedish quality and design make SunRoof an attractive choice for customers who value both functionality and the appearance of their homes.

Can rooflights be incorporated into metal panels or insulated metal panels?

Integrating rooflights or sidelights into roll-formed metal panels or insulated metal panels (IMP), or retrofitting deteriorated metal or asbestos panel, requires precision and accuracy. Tailored profiles for architectural projects are required to match performance specification.

Should solar panels be placed away from shade?

Solar panels should always be placed away from shade. Any shading trees or structures will affect the output of the system. It is better to build a solar power system that is smaller in terms of nominal output than a larger system that will be partly in the shade.

No elevated system - mounted flat and parallel to the roof; Use inexhaustible solar energy - absorb the sun's rays, generate electricity, feed it into the grid or consume it directly; ...
